PIYUSH SINGH

Software Development Engineer (SDE) Intern | Full-Stack Developer | Open-Source Contributor

Gurugram, India | piyushsinghdhanwal@gmail.com | www.piyushsinghh.in | github.com/mayo-byte07 | linkedin.com/in/mayeonng | leetcode.com/u/mayocreates

SUMMARY

Software Development Engineer (SDE) Intern candidate and third-year Computer Science (B.Tech) student with hands-on software development experience: built and scaled a production full-stack SaaS platform (15+ GitHub stars, 84 forks), reviewed and merged 70+ pull requests as an open-source Project Admin, and developed machine learning pipelines through Google Summer of Code (GSoC) and GirlScript Summer of Code (GSSoC) 2026. Strong foundation in data structures and algorithms, object-oriented programming, REST API development, and version control (Git/GitHub); 200+ problems solved on LeetCode across Python, SQL, and Pandas, including the Top SQL 50 badge. Seeking a Software Development Engineer Intern role to apply full-stack development and problem-solving skills to production engineering teams.

CORE SKILLS

Data Structures & Algorithms, Object-Oriented Programming (OOP), Software & System Design Fundamentals, Full-Stack Web Development, REST API Design & Development, Version Control (Git/GitHub), CI/CD (GitHub Actions), Unit Testing & Debugging, Software Development Life Cycle (SDLC), Agile/Collaborative Development, Database Design (SQL/NoSQL), Operating Systems & Computer Networks Fundamentals, Machine Learning & NLP, Technical Documentation, Algorithmic Problem Solving

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL, C++

Web & Backend Development: React, Next.js, Node.js, Express, MongoDB, Supabase, Firebase, REST APIs

Data Science & Machine Learning: Pandas, NumPy, Predictive Modeling, Natural Language Processing (NLP), Data Preprocessing, Model Evaluation

Computer Science Fundamentals: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, Computer Networks, Database Management Systems (DBMS), System Design Fundamentals, Dynamic Programming, Backtracking, Divide & Conquer

Tools & Platforms: Git, GitHub, GitHub Actions (CI/CD), Linux, Arduino/IoT, Model Context Protocol (MCP), Graphic Design

EXPERIENCE

Founder, ConnLink *Apr 2026 - Present*
Delhi, India (Hybrid)

- Designed, developed, and shipped Conn, a full-stack SaaS link-in-bio platform using React, Node.js, JavaScript, and CSS, positioned as a premium alternative to Linktree with customizable pages for links, social profiles, and content.
- Wrote, tested, and debugged production code across the full stack; grew the open-source repository to 15+ GitHub stars and 84 forks by maintaining a clean, well-documented, and maintainable codebase.

Project Admin & ML Contributor, GirlScript Summer of Code (GSSoC 2026) *May 2026 - Present*
Delhi, India (Remote) - Dual role: Project Admin and Contributor on ConnLink

- Performed code review on 70+ pull requests, ensuring code quality and adherence to repository standards, and resolved merge conflicts within a distributed Git/GitHub workflow.
- Mentored first-time open-source contributors through the software development lifecycle, from issue triage to pull request submission and review.
- Developed and trained machine learning models for predictive analysis and natural language processing; engineered data preprocessing pipelines that improved model accuracy and training efficiency.

Open-Source Contributor, Google Summer of Code (GSoC 2026) *May 2026 - Present*
Delhi, India (Remote)

- Collaborated with a distributed engineering team on open-source codebases using Git/GitHub version control, following established code review and contribution workflows.

Data Science Intern, Samatrix Consulting Pvt. Ltd. / Web Developer, UtsavAI *2025 - Present*
Remote / Roorkee, Uttarakhand, India (Hybrid)

- Wrote and debugged Python code for data science workflows and JavaScript for front-end development across two concurrent software engineering internships.

GDG Core Team - Student Organizer, GDG (Quantum University) *Sep 2025 - Present*
Roorkee, Uttarakhand, India (On-site)

- Organized developer-community coding events and workshops, applying full-stack development and technical communication skills to community programming.

PROJECTS

Conn - Full-Stack SaaS Link-in-Bio Platform (React, Node.js, JavaScript, CSS) *15 GitHub Stars, 84 Forks*

- Designed and implemented a full-stack SaaS link-in-bio platform from scratch, including front-end UI, back-end API, and database layer, as a premium alternative to Linktree.

Credit-Card-ML / Value-at-Risk-Project-ML / Diabetes Prediction ML (Python)

- Implemented three end-to-end machine learning pipelines covering classification and risk analysis, from data preprocessing through model evaluation and visualization.

AI PR Review Bot & Personal MCP Server (Node.js)

- Built a CI/CD-integrated GitHub Action (GitHub Actions) automating pull request review workflows, and a custom Model Context Protocol (MCP) server exposing weather, time, math, and notes tools to AI agents via a REST-based API.

IoT Alcohol Detection & Alert System (Arduino, C++)

- Built and debugged a real-time embedded detection and alert system in C++ using an Arduino UNO with an MQ-3 gas sensor.

HACKATHONS

- National Hackathon, Shivalik University, Dehradun - Top 10 (2025)
- Smart India Hackathon (SIH) 2025 - College Finalist, Top 5
- TechThrive 2026 - College Hackathon Participant
- HackIndia National Hackathon - Top 15 (2025)
- National Hackathon, NIT Delhi - Participant (2026)
- WHCL 2025 National Hackathon - Top 3 Finalist
- Matrix Hackathon, Kerala - Participant (2026)

EDUCATION

Quantum Global Campus (Quantum University) *Aug 2024 - Present*
Bachelor of Technology (B.Tech), Computer Software Engineering - Roorkee, Uttarakhand, India

CERTIFICATIONS

- Cybersecurity Job Simulation - Mastercard via Forage (Sep 2026)
- Introduction to Cybersecurity - Cisco (Aug 2025)
- An Introduction to Software Development - The Open University (Aug 2025)
- Google Play Academy - Google Play (Aug 2025)
